To All our Patients,

This is an announcement of an upcoming practice change. We have decided to formally separate from the Northeast Physician Health Organization and the newly formed BILH Organization effective December 31, 2023.

Effective January 1, 2024, we will be joining the primary care groups that are associated with Congenial Health. Congenial Health is under the auspices of the Tufts Network which will allow our practice to expand our insurance offerings in our community. Along with this is the freedom of patient choice in referrals to any specialist covered by your individual insurance plan and not dictated by any organization.

We are waiting for the finalization of contracts with insurance companies. This may require a call to **verify coverage** starting **in January 2024** for your PCP to remain as Dr. Bhattacharya or as Danvers Family Doctors, whichever your insurance requires.

We feel that this move will be a benefit for all as we continue to advocate for our patients in an ever-changing landscape and to also offer quality, compassionate care. Our website has a connection to Congenial Health for your review. If you have any questions or concerns, please feel free to call us at your convenience.

Thank you for your support during this period of transition,

*Danvers Family Doctors*
